

Mondex WiFi- user interface update

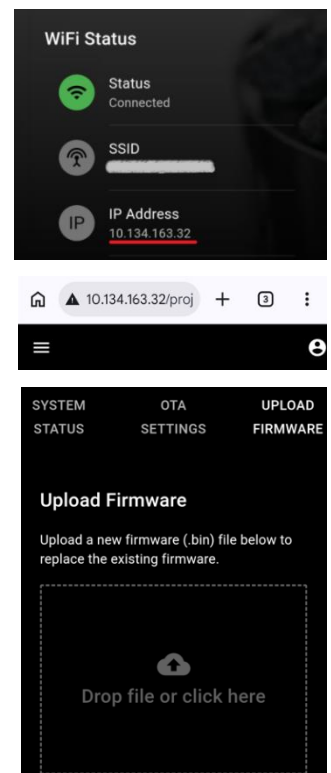

Download and unpack the update file to your device.

1. Factory Settings

- Set the control panel to factory settings by pressing the *Menu* and *Up* buttons simultaneously. 
- Scroll with the arrow buttons to find **FAC**, select it with the *Menu* button, and confirm by pressing *Menu* again. The text will flash three times, after which the controller has been reset to factory settings.
- Exit the menu by pressing the *Power* button. 

2. Installing the Update

- Open the device's WiFi network selection. After a moment, the **Mondex** network will appear.
- Network password: **mondex84100**
- Tap the notification **Sign in to network**, which opens the login page.
- If the device does not automatically suggest signing in, open the Mondex WiFi network settings and select **Manage server**.
- Log in with the credentials: **admin, admin**.
- Select **SCAN NETWORKS**, choose your network, enter its password, and confirm with **Save**.
- Select **WIFI STATUS** and copy the IP address assigned to the device. (If the controller does not connect immediately, press Refresh.)
- Return to your device's WiFi selection and connect to the network chosen in the previous step.
- Open a browser and enter the copied IP address into the address bar.
- Log in to the interface with the credentials: **admin, admin**.
- From the menu, select **System** and then **Upload Firmware**.
- Press the upload box, open the folder on your device where the update file was extracted, and select the file (.bin).
- Wait until the upload is completed and all notifications have disappeared.

3. Re-register the Heater

- Go to **Heater Registration**, enter the email address and the heater name you want to use for registration.
- If you use a previously registered email address, you can go directly to **app.mondex.fi** after registration and activate the new interface. If you use a new address, you will receive a registration email.
- If the old interface was saved on your home screen, remove it and go to **app.mondex.fi** to install the interface again following the app's instructions.
