SAUNA IS AN ESSENTIAL PART OF FINNISH LIFESTYLE

Listed as Intangible Cultural Heritage of Humanity by UNESCO, Finnish sauna culture is a fundamental part of everyday life in Finland. It is a place where we Finns warm ourselves during the harsh northern winter, relax at a summer cottage by a lake, and wash away the worries of the day. It is a place where we heal both body and soul.

Every sauna story is unique, and to us, each of them has its own magic.

NORDIC SAUNA EXPERTISE

Mondex was founded in 1992 on the west coast of Finland. Our first soapstone heaters introduced a new kind of sauna experience and quickly found their place in Finnish saunas.

Over the years, our product range has expanded to include both electric and wood-burning heaters as well as stone radiator solutions. Yet our goal remains unchanged: to create innovative sauna experiences that combine modern technology with the best traditions of Finnish sauna culture.

DESIGNED AND MANUFACTURED IN FINLAND

All Mondex products are designed, manufactured, and assembled in Finland. Quality, practicality, and long-term durability guide everything we do. Our products are built to withstand years of use while delivering a reliable and enjoyable sauna experience time after time.

BRINGING FINNISH SAUNA TRADITION TO NEW GENERATIONS

Finnish sauna culture continues to evolve, but its core values remain the same. Sauna has always been associated with authenticity, well-being, and spending time together.

Today, people around the world are increasingly seeking moments to slow down in the midst of their busy lives, recover from everyday stress, and focus on their overall well-being. Sauna offers a simple and natural way to slow down, relax, and recharge.

With decades of experience and a strong focus on innovation, Mondex continues to develop products inspired by the traditions of Finnish sauna culture while meeting the expectations of modern sauna users around the world.

Because there is no single right way to enjoy a sauna. Every sauna story is welcome.

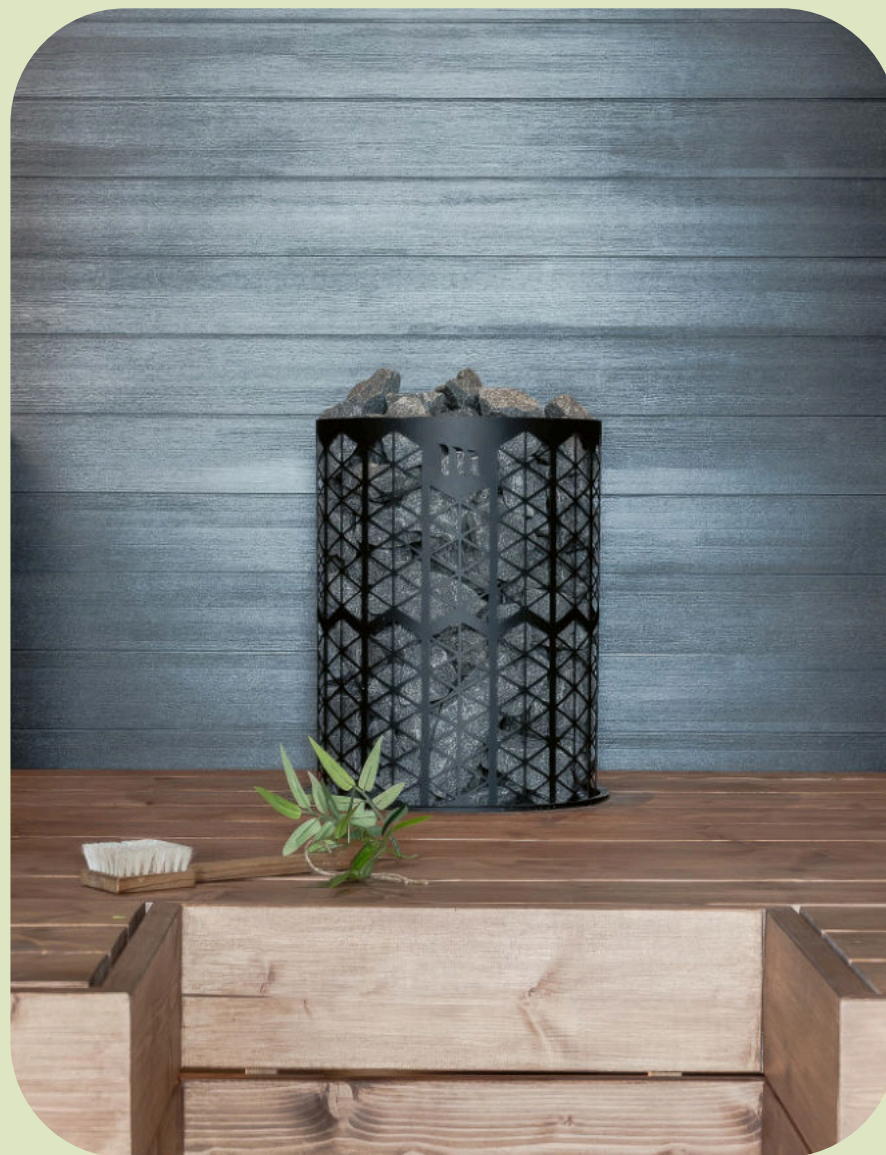

E2 – SMART SAUNA HEATING

The sauna experience begins long before the first steam rises from the stones. When heating your sauna is effortless, you can focus on what truly matters: relaxation.

The Mondex E2 control system makes sauna operation as simple and convenient as possible. With its easy-to-read digital display, you can check the sauna temperature at a glance and adjust it with one-degree precision to suit your personal preferences.

The separate control unit can be installed exactly where it is most convenient to use. It is suitable for the sauna, washroom, or dressing room, and can be mounted alongside a standard light switch box, blending seamlessly into your home's interior. The long standard control cable provides flexibility when planning the installation, even in larger sauna and bathing areas.

With the separate control unit, you can start heating immediately or schedule the sauna to be ready up to 24 hours in advance. After a workday, outdoor activities, or chores around the summer cottage, a warm sauna will be waiting for you at just the right time.

In many of our models, the separate control unit allows the heater to be integrated directly into the bench structure, providing greater freedom in sauna design and creating new opportunities for efficient space utilization and a refined, seamless appearance.

In addition to convenience, the E2 is designed with safety in mind. The child lock prevents accidental heater activation and unauthorized changes to the settings, providing extra peace of mind, especially for families with children.

The E2 controller also learns how your sauna behaves. Its intelligent heating function recognizes the sauna's heating requirements and helps maintain the desired temperature as consistently as possible.

Available in black or white, the stylish controller blends naturally into a wide range of interiors. Its clean design, ease of use, and precise temperature control make the Mondex E2 a natural choice for sauna enthusiasts who value comfort, flexibility, and worry-free sauna sessions.

E2 WiFi – YOUR SAUNA WITH YOU, WHEREVER YOU ARE

With Mondex E2 WiFi, heating your sauna is no longer tied to a specific time or place. E2 WiFi allows you to control your heater easily from a smartphone, tablet, or computer, so you can start your sauna whenever it best suits your schedule.

You can switch on your sauna remotely while driving home, walking to the cabin, or even when you are out on a run. The app allows you to adjust the temperature, manage heating times, and monitor the sauna's temperature in real time. When it is time to enjoy a sauna, the heat is already waiting for you.

Safety is a key part of the E2 WiFi system. The package includes a door sensor that monitors sauna use and helps ensure that the sauna can be heated safely even when controlled remotely.

E2 WiFi also provides valuable insights into sauna usage. The app tracks sauna sessions, heating times, and energy consumption, and reminds you when it is time to replace the sauna stones. This makes it easy to monitor both the condition and performance of your heater.

For many people, sauna is an essential part of well-being, weekly routines, and recovery. Mondex E2 WiFi makes sauna use and maintenance easier than ever, giving you more time to simply enjoy the sauna.

TAHKO M

6.6 / 9.0 / 10.5 kW

THE RELIABLE CHOICE FOR THOSE WHO APPRECIATE SOFT AND LONG-LASTING SAUNA STEAM

Tahko M combines high-quality construction, enjoyable sauna sessions, and easy-to-use mechanical controls. Thanks to its open stone surface, you can adjust the steam from soft and humid to more intense by throwing water on different parts of the heater. Tahko's compact design makes it an excellent choice for smaller saunas, while multiple power options also provide suitable solutions for larger spaces.

TAHKO E2/E2 WiFi

6.6 / 9.0 / 10.5 kW

SMART COMFORT FOR EVERY SAUNA SESSION

Tahko E2 delivers pleasant, even steam combined with modern control technology. The E2 control unit enables precise temperature adjustment and makes sauna heating effortless. Models equipped with E2 WiFi further enhance convenience by allowing complete remote control of the sauna. The heater can also be integrated into the bench structure, creating more usable space even in more compact saunas.

RAKKA M

6.6 / 9.0 / 10.5 kW

NATURE-INSPIRED SAUNA HEATER WITH AUTHENTIC FEATURES

Rakka M brings the atmosphere of a traditional sauna to an electric sauna. Its patented structure showcases the stones and highlights their natural, rugged beauty. The open stone surface allows water to be poured freely onto any part of the heater.

Thanks to its large stone capacity and unique structure, water vaporizes efficiently to create soft, humid, and long-lasting steam, just like in a traditional sauna.

RAKKA E2/E2 WiFi

6.6 / 9.0 / 10.5 kW

THE SPIRIT OF A TRADITIONAL SAUNA HEATER WITH MODERN CONTROLS

Rakka E2/E2 WiFi combines an authentic sauna atmosphere with modern convenience. Its patented open structure highlights the natural beauty of the stones, while the large stone capacity stores heat effectively.

You can adjust the character of the steam from gentle to more intense by pouring water on different parts of the heater, but the warmth always retains the feel of a traditional sauna.

Modern E2 and E2 WiFi control options make sauna heating effortless.

KAIRA

E2/E2 WiFi

6.6 / 9.0 kW

DESIGN HEATER THAT BLENDS SEAMLESSLY INTO THE SAUNA BENCHES

Minimalist design, a large stone capacity, and exceptionally flexible installation options make Kaira an ideal heater for virtually any sauna. It can be installed as a freestanding unit or integrated into the sauna benches, providing greater freedom in sauna design.

Its 100 kg stone capacity stores heat efficiently and produces a soft, long-lasting steam. Adjustable height, easy maintenance, and the availability of E2 and E2 WiFi control options make Kaira an excellent choice for modern saunas.

KALLA 2.0

E2/E2 WiFi

6.6 / 9.0 kW

SPACE-SAVING TOWER HEATER FOR MORE COMPACT SAUNAS

Kalla 2.0 is an upgraded version of the well-known Kalla heater, proving that a slim heater can still deliver a big sauna experience. Its slender structure takes up minimal space while distributing heat evenly and efficiently throughout the sauna. The resulting steam remains soft and balanced.

Refined details and a timeless design make Kalla 2.0 a natural choice for both new sauna projects and renovations.

Designed for installation close to the wall, Kalla 2.0 requires no rear safety clearance, making efficient use of available space. It can also be integrated into the bench structure to create even more room in the sauna. E2 and E2 WiFi controls add convenience and make heating the sauna effortless.

AURA E2/E2 WiFi

6.6 / 9.0 kW

COMPACT CORNER HEATER FOR VERSATILE SAUNA STEAM

Aura is an intelligent corner heater that allows you to utilize the sauna room efficiently. Corner installation frees valuable bench space, making Aura an excellent choice for both small and medium-sized saunas. It can be mounted directly against a wall structure or integrated into the bench design.

Its generous 70 kg stone capacity stores heat efficiently and produces a versatile sauna steam. Water can be poured both on the top and front of the heater, allowing you to adjust the steam to your preference easily. Modern styling, flexible installation options, and E2 and E2 WiFi control systems make Aura a practical and elegant choice for contemporary saunas.

TENO 2.0 M

6.6 / 9.0 kW

A MODERNIZED CLASSIC FOR TODAY'S SAUNAS

Teno 2.0 is an updated version of our popular wall-mounted heater, known for its efficiency, stylish design, and versatile sauna experience. Its updated construction distributes heat evenly throughout the heater, while the spiral heating elements ensure rapid heating. The generous stone capacity produces pleasant steam that can be adjusted from gentle to more intense by pouring water on different areas of the heater.

Teno 2.0 M features traditional mechanical control switches that can be installed on either side of the heater, providing greater flexibility in sauna design and installation.

MONDEX

TENO E2/E2 WiFi

6.6 / 9.0 kW

MODERN COMFORT WITH SMART CONTROLS

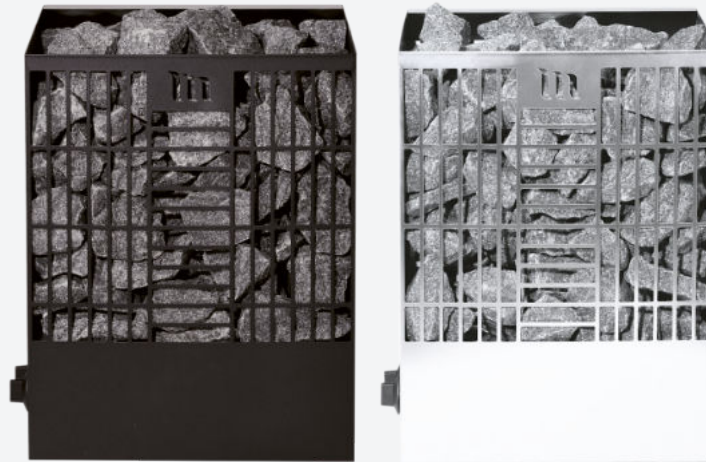

Teno 2.0 E2/E2 WiFi combines rapid heating, enjoyable steam, and modern controls. The E2 and E2 WiFi systems enable precise temperature control and effortless operation.

Teno 2.0 E2/E2 WiFi's clean appearance, carefully finished details, and modern control options make it a natural choice for contemporary saunas.

KYMI M

6.0 / 8.0 kW

CLASSIC WALL-MOUNTED HEATER FOR A MODERN SAUNA

Kymi is a traditional wall-mounted heater with a modern appearance and a versatile sauna experience. Its perforated front casing and 30 kg stone capacity distribute heat evenly throughout the sauna, creating a comfortable feeling from floor to ceiling.

The character of the steam can be adjusted by pouring water either on the front or top of the heater. Small safety clearance requirements make Kymi especially suitable for compact saunas. The control switches can be installed on either side of the heater, simplifying planning and installation.

AHTI M

6.0 / 8.0 kW

TIMELESS SAUNA
ATMOSPHERE WITH
GENUINE SOAPSTONE

Ahti combines Finnish soapstone and durable steel construction into a harmonious entity. Soapstone stores heat efficiently and releases it evenly, creating pleasantly humid and long-lasting steam.

Its clean design and the unique surface of natural stone bring a timeless look to the sauna that remains attractive year after year. Ahti is the ideal heater for sauna enthusiasts who appreciate traditional materials and a calm sauna experience.

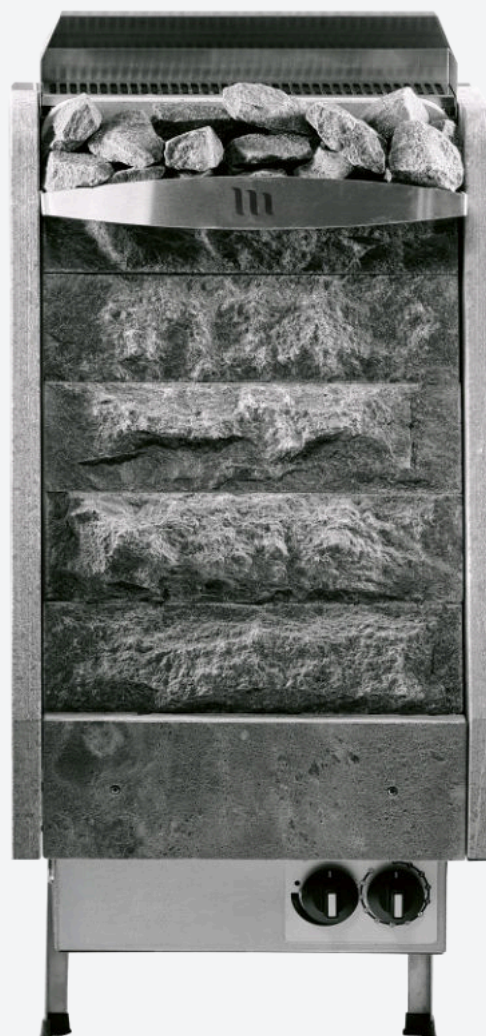

Ahti frees up additional sauna bench space because it requires no rear safety clearance and can be installed directly against a panel wall. Traditional mechanical controls are easy to use, and the side of the controls can be changed to simplify installation.

UKKO M

6.0 / 8.0 kW

THE NATURAL BEAUTY
OF FINNISH SOAPSTONE
IN YOUR SAUNA

Ukko brings the finest qualities of Finnish bedrock into the sauna experience. The combination of rough and smooth soapstone surfaces highlights the unique beauty of natural stone, making every heater one of a kind.

Soapstone stores heat efficiently and releases it evenly, producing pleasantly humid and long-lasting steam.

Ukko also frees up more bench space because it requires no rear safety clearance and can be installed directly against a panel wall. Traditional mechanical controls ensure simple and reliable operation.

LOUHI E2/E2 WiFi

6.6 / 9.0 kW

SOFT STEAM
POWERED BY FINNISH
SOAPSTONE

Louhi combines genuine Finnish soapstone with modern heater technology in an elegant design. Soapstone stores heat efficiently and releases it evenly, producing pleasantly humid, oxygen-rich, and long-lasting steam.

Its timeless appearance makes Louhi a striking part of the sauna interior, where natural materials take center stage.

Louhi can be installed directly against a panel wall without rear safety clearance, leaving more room for benches and interior solutions. E2 and E2 WiFi controls provide added convenience and allow you to heat the sauna to the desired temperature exactly when it suits you best.

HIISI E2/E2 WiFi

6.6 / 9.0 kW

A STRIKING
COMBINATION OF
SOAPSTONE AND
GRANITE

Hiisi combines rugged Finnish soapstone, elegant black granite, and modern heater technology. Carefully selected materials make the heater a stunning focal point, while the large stone mass produces pleasantly humid and even steam.

The heater can be installed directly against a panel wall without rear safety clearance, freeing up space for benches and interior design solutions. E2 and E2 WiFi electronic controls complete the user experience and make sauna heating effortless.

KLAPI

MODERN WOOD-
BURNING HEATER
FOR VERSATILE
STEAM

Klapi is a modern wood-burning heater that provides an enjoyable sauna experience with its soft steam and striking design. Its rounded shape, perforated outer casing, and generous stone capacity provide versatile steam ranging from soft and humid to more robust and intense.

Triple-channel combustion technology improves heating efficiency, reduces emissions, and makes effective use of firewood energy. Small safety clearances make Klapi an excellent choice for more compact saunas. The flue connection can be installed from the top or rear, and adjustable airflow control makes combustion easy to manage.

MOTTI

TRADITIONAL SAUNA ATMOSPHERE

Motti is a modern wood-burning sauna heater designed for homes, cottages, and outdoor saunas. Its generous stone capacity stores heat efficiently and produces a pleasant, long-lasting steam that can be enjoyed even after the fire has started to die down. The stylish perforated front panel distributes heat evenly throughout the sauna. The three-channel combustion technology ensures efficient, low-emission heating, allowing the sauna to warm up quickly with a relatively small amount of firewood. The flue connection can be installed either on the top or at the rear, making Motti suitable for a wide variety of sauna layouts.

Motti combines modern engineering, practical functionality, and the authentic atmosphere of a traditional wood-burning sauna.

MOTTI WITH WATER TANK

EFFICIENT WOOD-
BURNING HEATER
WITH AN INTEGRATED
WATER TANK

Motti with a water tank is a practical solution especially for cabins, outdoor saunas, and locations without running water. The 20-liter water tank mounted on the side of the heater warms washing water while the sauna is heating up, eliminating the need for a separate water-heating system.

The heater's 60 kg stone capacity stores heat efficiently and provides soft, long-lasting steam. The three-channel combustion technology ensures efficient, low-emission heating, while the flue connection can be installed either on the top or at the rear. The water tank can be mounted on either the left or right side of the heater, providing greater flexibility in sauna design and installation.

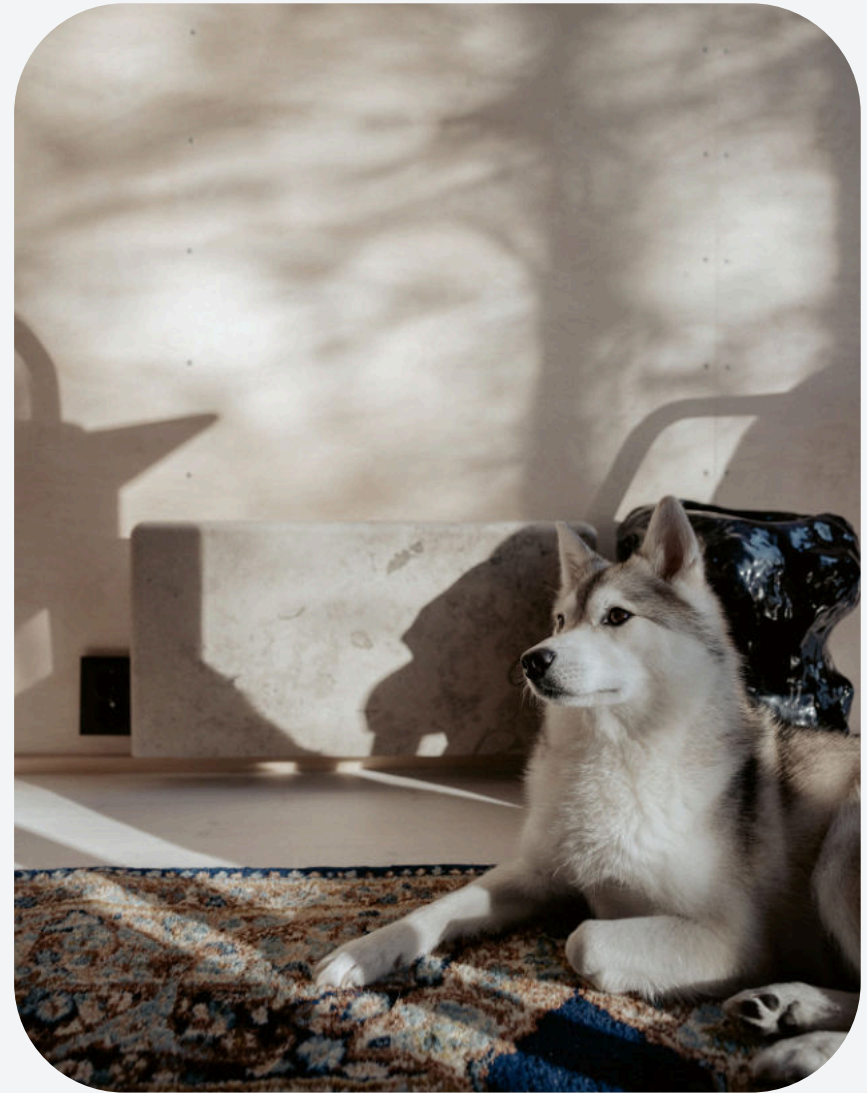

STONE RADIATORS

NATURAL STONE'S TIMELESS BEAUTY AND COMFORTABLE HEAT

Mondex stone radiators bring soft, natural warmth into the home. The genuine natural stone surface stores heat efficiently and releases it evenly and gently into the room. Indoor temperatures remain comfortable without sudden fluctuations or excessively hot surface temperatures.

The living surface of natural stone makes every radiator unique. Carefully selected stone materials and a refined appearance ensure the radiator remains a beautiful part of the interior even when heating is not required.

Silent operation contributes to a peaceful home environment without distracting noise. A precise electronic thermostat maintains a consistent room temperature, and the Ensto smart thermostat allows easy control via mobile devices. The timeless qualities of natural stone, energy efficiency, and ease of use make the stone radiator a pleasant heating solution for years to come.

Check the stone finish options on our website.

EMBEDDING FLANGE, TAHKO 6.6/9.0 kW

- stainless steel, black
- internal diameter: 39 cm
- external diameter: 50 cm
- required opening size: 46 cm

EMBEDDING FLANGE, TAHKO 10.5 kW

- stainless steel, black
- internal diameter: 45 cm
- external diameter: 57 cm
- required opening size: 50 cm

EMBEDDING FLANGE, RAKKA 6.6/9.0 kW

- internal diameter: 45 cm
- external diameter: 57 cm
- required opening size: 50 cm

EMBEDDING FLANGE, RAKKA 10.5 kW

- internal diameter: 56 cm
- external diameter: 68 cm
- required opening size: 63 cm

EMBEDDING FLANGE, AURA

- stainless steel, black
- interior width: 45.8 cm; exterior width: 58.8 cm
- interior depth: 15 cm; exterior depth: 21.5 cm
- required opening size: width: 54.8 cm; depth: 15.1 cm

EMBEDDING FLANGE, KALLA 2.0

- stainless steel, black
- interior width: 41.5 cm; exterior width: 57.5 cm
- interior depth: 33.4 cm; exterior depth: 41.5 cm
- required opening size: width: 50 cm, depth: 38 cm

EMBEDDING FLANGE, TENO 2.0

- stainless steel, black
- interior width: 44.5 cm; exterior width: 58.5 cm
- interior depth: 31 cm; exterior depth: 38 cm
- required opening size: width: 48.5 cm, depth: 33 cm

EMBEDDING FLANGE FOR SOAPSTONE HEATERS

- suitable for all soapstone heaters, as the depth can be reduced by 50 mm
- stainless steel or black
- interior width: 44.5 cm; exterior width: 57.5 cm
- interior depth: 31 cm; exterior depth: 37.5 cm
- required opening size: width: 51.5 cm, depth: 34.5 cm

EXTENSION PART, TAHKO 6.6/9.0/10.5 kW

- brings the heater out from the bench structure
- raises the height of the heater by 25 cm

EXTENSION PART, RAKKA 6.6/9.0/10.5 kW

- raises the heater 20 cm

EXTENSION PART, AURA 6.6/9.0 kW

- raises the heater 25 cm

SAFETY WALL, TAHKO

- stainless steel, black
- decreases the safety distance to the casing by 75%
- thickness 3.5 cm

SAFETY RAIL, TAHKO

- attaches to the casing of the heater
- consists of three parts, also available to be purchased individually. The 10.5 kW model is delivered in one piece
- material: black alder

SAFETY RAIL, KAIRA / KALLA 2.0

- attaches to the casing of the heater
- consists of three parts, also available to be purchased individually
- material: black alder

SAFETY RAIL, RAKKA

- attaches to the vertical bars of the heater between the stones
- delivered in one piece
- material: black alder

CORNER FITTING

- for the Ahti/Ukko and Louhi/Hiisi heaters
- enables the heater to be installed in a corner

PAIR OF STANDS FOR SOAPSTONE HEATERS

- raises the height of the heater by 20–30 cm (height adjustable)

PAIR OF STANDS FOR STONE RADIATORS

- enables the stone radiator to be installed away from the wall and to be moved from one place to another

STONE BASKET FOR THE FLUE

- the stone basket allows use of the heat in the flue
- fits most flues
- heater stones under Ø10 cm
- diameter 25 cm
- height 40 cm

BASE FOR WOOD-BURNING HEATERS

- stainless steel
- width: 49.3 cm, depth: 60 cm, height: 5.4 cm
- e.g. for protecting wooden floors when installing a wood-burning heater
- adjustable feet for easier installation

LED LIGHTS

- for the Louhi and Hiisi heaters
- 4 LEDs
- forms a fan-like light pattern behind the heater

E2-WiFi PACKAGE

- includes a controller with a Wi-Fi receiver
- includes a door switch
- fits all E2 models
- also available in white

CONTROLLER CABLE

- length 20 m
- suitable for E2 models

SENSOR CABLE

- length 10 m
- suitable for E2 models

GREAT SAUNA EXPERIENCES ARE BUILT ON SMALL DETAILS

A sauna offers an opportunity to relax, recover, and step away from the demands of the everyday life. And it does not take much to create an enjoyable sauna experience. The right temperature, pleasant steam, and an unhurried atmosphere make the sauna a perfect place to recharge both body and mind.

START SLOWLY

Sauna bathing is best enjoyed at your own pace and according to your personal comfort level. Everyone has their own preference for temperature and steam intensity, and the most important thing is finding what feels right for you. Good sauna steam feels soft and enjoyable rather than overwhelming, leaving you relaxed and refreshed afterwards.

TAKE BREAKS AND STAY HYDRATED

It is a good idea to drink water during the entire sauna session. Proper hydration supports a positive sauna experience, while cooling down between sauna sessions refreshes the body and enhances the relaxing effects of the heat. A quick dip in the water or a roll in the snow can be wonderfully invigorating.

A GREAT SAUNA ENGAGES ALL THE SENSES

The environment also plays a major role in sauna enjoyment. Soft lighting, natural-fiber towels and bench covers, pleasant sauna fragrances, and a clean sauna all help create a relaxing atmosphere. Relaxing music, the contrast between a hot sauna and a cold plunge or shower, and traditional practices such as using a sauna whisk can further enhance the experience. Sometimes the best sauna moments are shared with good company, while at other times they are enjoyed in peaceful solitude.

Usually, a successful sauna session is defined by how you feel afterwards: your body is relaxed, your mind is calm, and you feel refreshed. When that happens, the sauna has done its job.

Tips in a nutshell: Patience is one of the secrets of a great sauna experience. Taking your time, progressing at your own pace, and finding the right level of steam are often the key ingredients for truly enjoyable sauna experience.

ELECTRIC HEATERS
