

MONDEX

MONDEX E2/E2 WiFi

Precision. Simplicity. A sauna that is ready when you are.

E2 CONTROL SYSTEM

The Mondex E2 gives you complete command of your sauna experience, down to the exact degree. An easy-to-read, intuitive display shows your set temperature, the current sauna temperature, operating time and more, so you always know exactly what's happening inside your sauna. You can mount the control panel in the sauna room itself or place it neatly into the changing room or bathroom, wherever it serves you best.

A HOT SAUNA, READY FOR YOU

No more waiting around. Schedule your heater to switch on up to 24 hours in advance and step straight into a perfect sauna.

SAFE FOR FAMILY USE

The keypad lock prevents children from accidentally changing settings or restarting the sauna heater.

MADE TO MATCH YOUR SAUNA

Available in black or white, the E2 is designed to complement any sauna interior. It is understated, elegant, and unmistakably at home in your space.

BUILT FOR EASY INSTALLATION

The controller comes standard with a 10-meter controller cable (20-meter cable available on request) and a 4-meter sensor cable (10 meters available on request), giving you the flexibility to place the unit exactly where it works best for you.

E2 WiFi CONTROL SYSTEM

Turn on the sauna heater when you are lounging on the sofa, stuck in traffic, or halfway through a jog in the forest. With Mondex E2 WiFi, your sauna is always only a tap away. Built on the precise, elegant E2 electrical controller, the WiFi version adds a fully remote aspect to your sauna. Start your sauna experience before you even reach home!

Remote control requires the heater to be connected to a Wi-Fi and a compatible smartphone, tablet or computer.

Mondex. Quality, design and Finnish craftsmanship – visible in every detail, felt in everyday use, and trusted to last

Mondex heaters. Sauna heaters that combine authentic Finnish steam with lasting warmth and Nordic design.

READY FOR YOU, ANYTIME

Adjust your desired temperature, extend the heating time, or check exactly how warm it is inside the sauna, all from a web app on your phone, tablet or computer.

SAFETY THAT STARTS AT THE DOOR

Every E2 WiFi package includes a door sensor that checks the sauna door is closed before heating begins, giving you an extra layer of safety.

KNOW YOUR SAUNA HEATER, INSIDE AND OUT

The E2 WiFi learns your sauna habits while you use it. You can track how many times the sauna has been used as well as total operating hours and electricity consumption. You can add the current price of electricity in the app and see how much heating the sauna actually costs. A built-in sauna diary keeps a record of every session, and the app even lets you know when it's time to replace the sauna stones in your heater.
