

 MONDEX

RAKKA M/E2/E2 WiFi

A UNIQUE DESIGN SAUNA HEATER WITH AUTHENTIC LÖYLY

Rakka is a one-of-a-kind design heater whose patented structure highlights the naturally rugged beauty of stone. The heater has no metal case, so water can be thrown anywhere on the heater.

Thanks to its structure and the large number of stones, the heater vaporizes water efficiently, producing a rich, long-lasting, and moist steam – just like in a wood-burning heater.

Mondex. Quality, design and Finnish craftsmanship - visible in every detail, felt in everyday use, and trusted to last.

Mondex heaters. Sauna heaters that combine authentic Finnish steam with lasting warmth and Nordic design.

NATURAL, ROBUST DESIGN

Inspired by the rocky landscape of Finnish Lapland, the design of this heater is rugged and natural. Rakka is not just a heater but a striking architectural element in the sauna.

AUTHENTIC STEAM

WITH SUPERIOR HEAT RETENTION

A large 140–200 kg stone capacity produces soft, long-lasting steam and ensures consistent heat and efficient drying after use.

FLEXIBLE INSTALLATION TO SUIT ANY SAUNA

Can be installed freely on the floor or integrated into the bench structure. Small safety distances and accessories make Rakka a natural fit to any sauna.

OPEN STRUCTURE FOR EASY WATER THROWING

The patented open structure allows water to be thrown on the heater's entire surface. This makes the sauna experience more versatile and immersive.

DURABLE STRUCTURE

The double-layered structure and replaceable inner stones extend the heater's lifespan and make long-term maintenance easier.

MODERN CONTROL OPTIONS

Available with E2, E2 WiFi, and traditional mechanical controls. Easy to use and adapt to different needs.
