THE NEW MONDEX TENO 2.0 OFFERS RENEWED EFFICIENCY AND DESIGN

Teno 2.0 is an energy-efficient wall-mounted sauna heater with flexible control options. Its 40 kg stone capacity produces rich and varied steam, sharper heat from the top and softer steam from the sides. Spiral heating elements speed up the heating time and distribute warmth evenly throughout the stones.

Teno 2.0 can be operated with traditional mechanical controls, digital E2 controller, or remotely via a mobile device. The modern perforated outer shell completes the clean, refined look and helps the heater blend beautifully into the sauna interior.

The updated Teno 2.0 has a more contemporary and visually lighter exterior design. The upper air guide has been moved inside the heater to create a cleaner, more streamlined silhouette, while the redesigned perforated pattern adds a seamless and elegant look. The refined structure also improves airflow and enhances overall heat distribution, and the result is a more balanced sauna experience.

COMPACT DESIGN, COMFORTABLE STEAM

40 kg stone capacity provides pleasant, well-balanced steam.

WALL-MOUNTED, SPACE-SAVING SOLUTION

Designed for smaller and medium-sized saunas. Wall-mounted installation keeps floor space clear and creates a clean, modern look.

MODERN CONTROL OPTIONS

Available with E2 and E2 WiFi controls. Accurate temperature adjustment, timer functions and remote control capabilities.

EFFICIENT PERFORMANCE FOR EVERYDAY SAUNAS

Fast heating and even heat distribution for a comfortable sauna experience.

NORDIC DESIGN BUILT TO LAST

Available in perforated brushed stainless steel or matte black. A durable and stylish choice for both new and renovated saunas.
